

Mariia Synelnyk

Full-Stack Developer

Personal Data

E-Mail: mariesnlk90@gmail.com

Address: 81925 Munich, Germany

LinkedIn: <https://www.linkedin.com/in/mariia-synelnyk/>

Full-Stack Software Engineer with 5+ years of experience building scalable full-stack applications using React, TypeScript, GraphQL, Java, and PostgreSQL. Experienced in AI-powered LegalTech solutions, backend architecture, performance optimization, and end-to-end feature ownership.

Languages

- English (C1)
- German (B2)
- Ukrainian (Native)
- Russian (Native)
- French (A1)

Skills

- TypeScript • Java • JavaScript • Python • SQL • Solidity • Rust
- React • Next.js • GraphQL • Apollo Client • Ant Design • Chakra UI • Storybook
- Spring Boot • Spring Security • Node.js • FastAPI • REST APIs • JWT
- PostgreSQL • MySQL • MongoDB
- JUnit • Mockito • Vitest • Jest
- Git • Docker • Jenkins • Azure • Postman • Jira • Grafana

Education

Micro Master's program: Solution Architecture

SET University, online

May 2025 to July 2025

Bachelor of Software Engineering

National University Kyiv-Mohyla Academy (NaUKMA), Kyiv, Ukraine

September 2018 to June 2022

Grade: 81,82 (From 60 to 100; 100=best grade)

Work Experience

Software Engineer

Eltemate/Hogan Lovells Cadwalader technology company, Munich, Germany

October 2023 to Present

- Led end-to-end feature delivery from stakeholder requirements to production release across frontend and backend.
- Developed AI-powered LegalTech features including AI summaries, document chat, semantic search, and workflow management.
- Built reusable React components with Ant Design and Storybook.
- Optimized PostgreSQL queries, reducing filtered query time from 13s to 5s.
- Integrated backend services, third-party APIs, M2M authentication, real-time notifications, and email workflows.
- Achieved 80%+ backend test coverage with integration and unit tests.
- Reduced frontend QA defects by ~80% through proactive edge-case handling.
- Identified RAG and semantic search issues early, reducing feature delivery time by 30%.
- Collaborated with product, AI, design, and engineering teams on architecture, documentation, and solution design.
- Mentored 2 frontend developers on backend architecture and project onboarding.

Blockchain Developer

Applicature, remote

January 2021 to January 2022

- Developed and deployed 20+ smart contracts across 2 blockchain networks.
- Built automated smart contract tests using Hardhat, Chai, and Waffle.
- Audited and supported 20+ partner blockchain projects.
- Designed and implemented a cross-chain bridge for third-party integrations.
- Led 2 developers, conducted code reviews, and collaborated within a team of 15+.

Junior Java Developer

FlexyChain, Kyiv, Ukraine

April 2021 to September 2021

- Developed REST APIs and backend services using Java, Spring Boot, and SQL.
- Built Telegram bots for monitoring and remotely restarting 5 backend servers, reducing downtime.
- Automated backend and frontend deployments with Jenkins, streamlining the CI/CD process.

Intern Java Developer

Epam Systems, Kyiv, Ukraine

October 2020 to March 2021

- Developed a Java Spring Boot application with MySQL.
- Implemented REST APIs, authentication, and database persistence.
- Created unit tests with JUnit and Mockito.
